

Sravan Kumar Koyyada

Computer Science and Engineering, Rajiv Gandhi University of Knowledge Technologies, Basar

+91 7680912116 — sravankoyyada28@gmail.com — Github — LinkedIn

OBJECTIVE

Passionated Computer Science graduate with hands-on experience in software development, SDLC, and database systems. Skilled in AIML technologies, Java, Python, SQL, and modern frameworks, seeking to contribute as a Software Engineer by applying technical expertise and problem-solving abilities to deliver scalable software solutions.

EDUCATION

- Bachelor of Technology in Computer Science and Engineering** 2021 - 2025
Rajiv Gandhi University of Knowledge Technologies-Basar CGPA: 7.9
- Pre-University Course** 2019 - 2021
Rajiv Gandhi University of Knowledge Technologies-Basar CGPA: 7.6
- S.S.C** 2016 - 2019
ZPHS Gatlakaniparthu CGPA: 9.7

EXPERIENCE

- Project Associate 1 - CSIR- National Aerospace Laboratories, Bangalore** 08/2025 - 10/2025
 - Working in the UAV (Unmanned Aerial Vehicle) Division focusing on computer vision and image processing Technologies and ML Models Training. YOLO Machine learning models traing for Object detection, Tracking and feature extraction for very high altitude Images and Videos.
 - Utilizing Roboflow for dataset management, annotation, and preprocessing to streamline training workflows Annotated. Cre-ated training dataset of 5000+ images for ML model traing for Object detection.
- GAPP Trainee (Development and Engineering) - Bharat Electronics Limited (BEL), Bangalore** 08/2025 - 10/2025
 - Involved in Designing and development of a GUI-based application. Utilized C++ and QT Creater for functional implementa-tion. Applied software development life cycle practices including requirements gathering, implementation, and testing.
- Summer Intern - Hindustan Aeronautics Limited (HAL), Bangalore** 05/2024 - 07/2024
 - Developed GUI modules for the Mission Planning and Debriefing System (MPDS) using Java Full stack, JavaFX, and Spring framework. Participated in requirements analysis, design documentation, functional and integration testing.

PROJECTS

- Leveraging D-Wave Quantum Annealing for Optimization Solutions** Github
 - Investigated the use of D-Wave quantum annealing to optimize computationally intensive ML tasks such as hyperparameter tuning, feature selection, and model training.
 - Conducted experiments integrating classical ML algorithms like Clustering algorithms, SVM algo with quantum annealing approaches, demonstrating potential improvements in resource utilization and performance.
- Credit Card Usage Analysis Project (React + .NET)**
 - Designed and developed a full-stack web application to analyze and visualize client credit card expenditures using React.js (frontend) and C .NET Web API (backend).
 - Built interactive data visualizations with Recharts (Pie Chart) to provide clear insights into category-wise spending patterns.

SKILLS

Programming Languages: Java, Python, C#, C++, C
AI : Machine Learning, YOLO models, roboflow, Neural Networks, CNN, RNN, LLMs, Computer Vision technologies
Software Development: SDLC, debugging, unit testing, defect fixing, documentation
Web Development & Frameworks: HTML, CSS, JavaScript, React.js, taiwind CSS,MySQL, PostgreSQL, Springboot
Softwares and Tools: Git, Visual Studio Code, Eclipse, QT creater, Scene Builder,Agisoft metashape, Spectronon
Soft Skills: Teamwork, communication, adaptability, problem-solving, quick learning

ACHIEVEMENTS

- National Level INSPIRE-MANAK 2019 finalist at IIT Delhi, recognized for innovative scientific potential.
- Secured 1st place in Mandal and District-level Mathematics Talent Competitions (TMF).
- Recognized for fast learning and effective teamwork in technical and cross-functional environments.
